## Volumising and wrinkle treatments ..... from \$200

Voluma is a new injectable gel that is specially formulated to restore and enhance facial volume. One of the main changes that occur to our face over time is volume loss. The overall shape and contour of the face changes with age as the effects of gravity can become apparent. Restoring the soft tissue of the face by adding volume is becoming a corner stone of facial rejuvenation science. Volume rejuvenation treatment gives instant results that can last up to 18 months to 2 years.

Hyaluronic acid (HA) is also used to increase lip size, restore fullness and diminish lines. It has instant results that can last up to a year.

Wrinkle treatments are designed to soften frown lines and crow's feet. It can be used for downward smiles and lines above lips. Results can take a few days and can last 3-4 months.
